Science Revision Activities

1. Flashcard Challenge

- Create flashcards for key terms, equations, and processes (e.g., photosynthesis, Newton's laws).
- Use apps like Quizlet or physical cards.
- **Activity twist:** Time yourself to see how many you can correctly answer in 2 minutes.

2. Mind Map Connections

- Pick a topic (e.g., Energy, Genetics) and draw a mind map linking concepts.
- Include diagrams, keywords, and examples.
- **Bonus:** Use color coding for Biology, Chemistry, and Physics.

3. Past Paper Power Hour

- Download AQA past papers and complete one under timed conditions.
- Mark it using the official mark scheme.
- **Tip:** Focus on command words like "describe," "explain," and "evaluate."

4. Equation Relay

- Write all Physics equations on a sheet.
- Cover them and try to recall each one.
- **Extra challenge:** Apply them to quick calculation questions.

5. Teach It to Someone Else

- Explain a topic (e.g., the carbon cycle or ionic bonding) to a friend or family member.
- Teaching reinforces understanding and highlights gaps in knowledge.

"Every accomplishment starts with the decision to try."
